We are all looking for a sunny Easter, a great Royal

A resolution was also passed recommending

the continuance of the Empire on a

preferential trade basis.

orderly conduct were held that a repetition of

the offence would be met by imprisonment.

corporal punishment in the army is abolished

in war time.

Preliminary negotiations have taken place

between the Board of Trade, British ship-

owners, and representatives of the Seamen's

Union.

overcome in the Australian and New Zea-

land navigation legislation.

The height of the Asouan Dam, in Upper

Egypt, is to be increased at a cost of

£1,000,000.

The raising of the dam is calculated to

reduce the annual value of the cotton crop

by £4,000,000.

were resolved that Chinese labour in the

mines should cease at the earliest moment.

But the Chinese would not be repatriated

till substitutes were found.

The Assembly passed the Chinese Labour

Franchise Bill, the Debate of the Bill,

and sent it to the Council.

The measure will not be debated by the

Legislative Council until Parliament re-

assembles in June.

The Government contemplates asking for a

loan of £2,000,000 to establish a land bank.

The salient feature of the Assembly pro-

ceedings was the enactment of General

Botha.

Everything in the Assembly was left to

the Government, Colonial Secretary, and Mr. Schak-

A. Burger.

Other Boers interrupted the proceedings,

and insisted upon the officials speaking Dutch

after they had begun in English.

It is believed that the Afrikaner Bond

will do nothing to retard the federation of

£161,872 for the half-year ended December 31,

£1,332,726.

It is anticipated that the expenditure at the

end of the financial year will also show an

increase.

Mr. Chapman intends to devote attention to

the matter of increasing accommodation at

the Sydney Post Office.

He says an additional storey would do a lot

towards providing extra space for officials.

A large sum will be put on the Estimates

next session to meet the need.

Mr. Chapman says that everything is running

smoothly in the Defence Department.

The Premier states that the question of

removing the Rockdale sewage farm has to

be faced, and the Minister for the Interior

Office, has invented an effective contrivance

for closing and sealing mailbags.

It cost the Commonwealth between £10,000

and £15,000, and was, string, and was

best suited for this purpose.

That money would be saved by the intro-

duction of a mechanical security.

The Melbourne "Herald" was yesterday fined

pending.

The Sydney Hospital's strike in New Zealand

has been settled.

Captain Thorpe and crew, of the wrecked

cattle steamer Milder, reached Fremantle in

the Burmabutte yesterday.

The captain thinks an abnormally strong

easternly current carried the vessel to

western land.

He says there is no chance of refloating the

vessel.

A shipping combine comprising a British

company and two German companies has

been formed.

The object of the combine is to improve the

service between New York and Australia.

LOWE'S TWO STORES.

A COMPLETE CONCERN FOR MALE ATTIRE NOW!

Progression is still the order of the day at Lowe's. The phenomenal strides which we have made in the Men's Wear Trade, namely, Tailoring, Hats, Mercery, and Boys' and Men's Clothing, has necessitated the organising of the whole concern into an institute solely for male attire. At one time we catered for both men and women, but the men's wear trade rapidly outgrew its space, and the consequence was we disposed of the whole of our ladies' stock in order to utilise all our space and energy for the male section of our oft-repeated saying, "Watch Me Grow."

Messrs. Grace Bros. are the purchasers of the balance of the stocks in our Women's Department. We have given up our premises at 25 and 27 Oxford-st., for which we were never able to secure a lease, but have enlarged our Men's Department to double their previous space.

READY-TO-WEAR CLOTHING FOR MEN, BOYS, AND YOUTHS.

This is another section which has developed a great growth, and the need for a separate section of the fact that we have made it a feature of our stores to introduce something "different," in the way of ready-made clothing.

In the past, sellers of clothing held the idea that anything would suit, and that the more the better, or as those used to be termed, a "shop" suit. Many still hold this idea to-day.

We have always thought very differently, and believe that the class of clothing for men, boys, and youths that has never been placed before the public has been a success. The suits purchased from us have the appearance of a bespoke suit, but of a ready-made suit such as sold elsewhere.

When you purchase a ready-to-wear service suit from Lowe's, you know that you are getting the greatest value for your money possible.

LOWE'S FAMOUS TAILORING.

The phenomenal and continued success of this important Dept. within a few years in itself is a past-master in the art of tailoring. Do not forget that the organisers of our tailoring trade are now the largest in Sydney, and probably the largest in Australia. We have solved the problem of good Tailoring at a moderate cost, and have proved that our knowledge of our business is unequalled, and that we intend to maintain this record of success and thousands of persons for their continued patronage and confidence bestowed upon us during our business history, and it is these who are to a great extent responsible for our great success in this our greatest of departments. We intend to keep up our reputation of saving you £1 on every suit we make.

LOWE'S GREAT TRADING POLICY.

Our business has expanded and progressed faster than any other business in the history of Australian commerce. We with you know that the great feature of our business is its small size, which has always been our guiding star, so to say here it is— "small profits, big returns."

We mark all our goods in plain figures, and confine our business to a strictly cash-down basis, we are enabled to sell at least 20 per cent. cheaper than the firm which does a booking trade.

WE NOW OPEN ANOTHER PAGE IN THE PROGRESSIVE HISTORY OF LOWE'S GREATEST STORES.

OUR FUTURE PROGRAMME.

The wages of our large business have been turned into an exclusive Men's Wear establishment, we shall devote all our time, energies, ideas, attention, and methods of management. Every branch of the business will be under the direct personal supervision of our Mr. W. Lowe, who will see that the business is conducted in the best and most economical way, and which will assure to our thousands of patrons all over Australia that we will at all times give them satisfaction, and which will bring them back again and again to our Stores as permanent customers.

The Archdeacon of Sydney on Sunday morning at the Chapel of St. John the Evangelist, the afternoon dedicated the church of St. Peter's, Sherwood, on Tuesday evening. Preached at the annual meeting of the Church Missionary Society, at the Wesleyan Tabernacle, Hall; on Wednesday afternoon he preached in the Cathedral; on Thursday afternoon he presided at the annual meeting of the Council of the Society fund in connection with the Church Society, and in the evening presided at the annual meeting of the New South Wales Auxiliary of the British and Foreign Bible Society.

Father Lawrence, S.M., and the sermon of the Saint was preached by the Rev. Father Gwynne, S.J. The choir rendered Gounod's "Missa Solemnis," and the organist was his Lordship Dr. Oliver, S.M., Bishop of Tomi, who preached the sermon, describing missionary life in the islands of the South Seas.

interest.

vice to be held in the Pitt-street Church.

THE NORTH-WEST PASSAGE, discovered by Sir John Franklin, was during the last three years investigated by Captain Amundsen. One by one the vast places covered in old maps with pictures of strange beasts, or with the two words terra incognita, are being mapped and charted. In Africa—

In the mysterious land, surrounded by the sea of sand,

Created for to be the base Of Mr. Joseph Chamberlain

—The French engineers are making an enormous reduction in the amount of land formerly regarded as desert, as our own explorers have done in Australia. For the French only, for the last mail brings news of the success of the Alexander expedition across Africa, from the West Coast by the Great Lakes to Mombasa. In Asia, Russian administrators have colonized and cultivated barren steppes, and have corrected our ideas of the courses of mountains and rivers. In Africa, Sven Hedin announces the close of a successful and fruitful exploration. In South America the demand for rubber has driven forward the hunters, who have explored the headwaters of the Amazon, and added fresh territory to Bolivia and Brazil. In many cases, especially in Africa and South America, the progress of exploration has been followed by great additions to our knowledge of botany and zoology. Hedin, giving an explanation of this curious mental "kink," says: "It is well for us to remember that the average man unconsciously retains his old childhood's idea that because something is novel and rare, it must be good. That we have done well in this is evident, for the world, which was then in a general way a desert, is now in the front, the most beautiful harbour in the world, and yet down of them are not the vaguest traces of the old civilization in which they had their origin."

It is with some pride that Sydney offers the assurance to her many thousands of visitors this year that they will not be disappointed in the entertainment their metropolis has to offer.

THE WORLD SO WIDE.

SATURDAY, MARCH 23, 1907.

THE EASTER HOLIDAY.

In one of our telegrams this week there may have been some consolation to those people who lament the gradual decrease on the map of the number of spots that are invested with the charm of the unknown. Mr. Morley, we are told, has refused permission to the Geographical Society to obtain measurements of Mount Everest from the Thibetan side, and has maintained his refusal against the angry protest of Sir Charles Goldie. It was not suggested that the expedition would interfere with the security of the Thibetan or betray any secret of State. It may have been that a great German attempt of which the ninth edition was issued in 1905, was in June of 1906 already in the hands of a committee of revision. In later editions it is predicted the only lands unmapped will be those too hot or too cold for human existence, or those in which great heat and moisture have stimulated the growth of impenetrable forests.

To-day's "Herald"—Mr. Lucy has some pleasant reminiscences about H. G. Keen and his "Giant" in a letter to the Herald. In the writer's daily walk with the most recent fashions, and concludes with an account of stage activities. The third and final article of the series on Cities Extension by Mr. J. D. Fitzgerald summarizes the conventions scheme for a drain belt for Greater Sydney. The fourth article is on the Progress of Ships in Sydney has a review of the progress of shipping up to about 1900, including the arrival of the first mailboat. Our military correspondent, in an article headed "The Easter Camp," reviews not only the forthcoming continuous training, but also the general military situation. In view of the recent events in South Africa, will attach to an outside article on Universal Reform by "Vidette." A sketch of the old crossing of the Nepean beyond Penrith will be found to have imagination. Mr. Rainbow, of the Australian Museum, apropos of a recent case of severe illness resulting from the bite of the red striped spider, contributes an interesting article on his paper on the objectionable beastie in question.

Return of the Minister for Mines.—Mr. G. W. Moore, Minister for Mines and Agriculture, who has been on a visit to the Bingara electorate, which he represents in the Legislative Assembly, returned to Sydney yesterday. Besides opening the Warialda show on March 19, Mr. Moore, in a speech at his constituents at Bingara, Baraba, Barilla, and the Upper Bingara and Gulf Creek mining fields. Everywhere he was most cordially received. The show was practically spoiled by rain, but the district became very large by the downpour. Heavy rains were experienced pretty well over the whole of the northern districts, and for the most part, as far as the mining districts are concerned, the miners have long ago had to submit to the inconvenience of staying in their huts. The miners have been compelled to leave their huts and go to the open air, and can get to the very bottom of it in about two-and-a-half hours' train trip to the city.

Although there is a wide field of choice open to the sightseer and holiday-maker, still to see really the best the State has to offer one must go to the Blue Mountains, that kindly range, at once Nature's playground and workshop, all within walking distance, embracing the whole gamut of scenic beauty—the placid majesty of the plains at your feet, the simply charming glacial vibrations with the language of the mountain streams, the grandeur of the imposing waterfall and the wild wonder of the clefts frowning beneath their bark of bearing high above the clouds. The more one sees of the Blue Mountains the greater is the admiration, and the eightier it offers an abounding interest, as to the jaded city toils it presents a perfect paradise of peace. It is holiday-ground, tourist resort, and, notwithstanding its high altitude, a great place for health, and other expressions of sympathy during the late and barren months.
